SMOKEFREE WORKPLACES

Save lives

Risk for heart attacks increased for non-smokers exposed to secondhand smoke.

25-30% increase

According to the Mayo Clinic, heart attack rates fell by 33% after a smokefree workplace law went into effect.

33% decrease

Breathing secondhand smoke for even a short time can have immediate adverse effects on the body.

It can interfere with the normal function of the heart, blood, and vascular systems.
